

C 3.164.930-E / 963/7

United States Foreign Trade

U. S. DEPARTMENT OF COMMERCE

Luther H. Hodges, Secretary

BUREAU OF THE CENSUS
Richard M. Scammon, DirectorSUMMARY REPORT
FT 930-ESEP 1963
July 1963FOR RELEASE
September 17, 1963

EXPORT TRADE BY COMMODITY

The Bureau of the Census, Department of Commerce, announced today that the decrease in United States exports of domestic merchandise from \$1,838.2 million in June to \$1,795.1 million in July¹, a decrease of about two percent, resulted from decreases in exports of finished manufactures and crude materials which were partly offset by increases in exports of semimanufactures, manufactured foodstuffs and crude foodstuffs. The July 1963 domestic merchandise export total was, however, about six percent higher than the July 1962 total of \$1,698.8 million. These totals include data on Department of Defense Military Assistance Program—Grant-Aid shipments.

With Military Assistance Program—Grant-Aid shipments excluded, the July domestic merchandise export total amounted to \$1,690.7 million, a level about four percent lower than the June total of \$1,751.8 million but about six percent higher than the July 1962 total of \$1,602.2 million.

Exports of finished manufactures fell from \$1,100.5 million in June to \$1,046.8 million in July reflecting decreases in exports of individual items included in this economic class. Some of the more notable of these decreases were as follows: automobile parts for assembly and replacement, from \$59.5 to \$46.7 million;

¹ See the July 1963 issue of Report No. FT 900-E for seasonally-adjusted figures on total exports, excluding Military Assistance Program—Grant-Aid shipments. Seasonally-adjusted data are not available on a commodity basis.

passenger cars, from \$22.7 to \$10.9 million; radio and television apparatus, from \$37.4 to \$30.9 million; tractors, from \$25.2 to \$18.8 million; and metalworking machines and parts, except machine tools and parts, from \$16.4 to \$12.0 million. However, exports of lubricating oil, also included in this economic class, advanced from \$16.7 to \$22.4 million. The decrease in exports of crude materials, from \$198.8 to \$182.6 million, was largely accounted for by decreases in exports of unmanufactured cotton, from \$34.5 to \$25.9 million, and unmanufactured tobacco, from \$29.5 to \$24.4 million.

Exports of semimanufactures advanced from \$259.5 to \$271.9 million partly due to increases in exports of coal tar and other cyclic chemical products, from \$13.0 to \$18.9 million, and synthetic rubber, from \$11.0 to \$13.4 million. Exports of manufactured foodstuffs increased from \$104.0 to \$112.8 million as increases in exports of milled rice, from \$6.8 to \$16.2 million, and manufactured foodstuffs, exported for relief or charity, from \$9.0 to \$14.1 million were partly offset by a decrease in exports of wheat flour from \$16.6 to \$7.1 million. Exports of crude foodstuffs rose from \$175.6 to \$181.0 million as a substantial increase in exports of wheat, from \$71.1 to \$91.2 million, was partly offset by a decrease in exports of corn, from \$56.9 to \$47.9 million.

EXPLANATION OF STATISTICS

COVERAGE: Export statistics include government as well as nongovernment shipments to foreign countries. The export statistics, therefore, include Department of Defense Military Assistance Program—Grant-Aid shipments (for which separate figures are shown in the footnotes of this report), Mutual Security Program economic assistance shipments, and shipments of agricultural commodities under P.L. 480 (The Trade Development and Assistance Act of 1954, as amended) and related laws. (The separate information which is available on exports under P.L. 480 and related laws may be obtained from the Economic Research Service and the Foreign Agricultural Service of the Department of Agriculture. Shipments to United States armed forces and diplomatic missions abroad for their own use are excluded from export statistics. United States trade with Puerto Rico and United States possessions is not included in this report, but the export trade of Puerto Rico with foreign countries is included as a part of the United States export trade. Merchandise shipped in transit through the United States between foreign countries, not entered as imports, is not included in export statistics.

VALUATION: The valuation definition used in the export statistics is the value at the seaport, border point, or airport of exportation. It is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port of exportation. Transportation and other costs beyond the United States port of exportation are excluded. None of the values have been adjusted for changes in price level.

RELIABILITY: The statistics presented in this report are based partly on sample data and therefore are subject to sampling variation that may cause them to differ somewhat from the results which would have been obtained from processing all export documents. For the figures shown in this report the sampling variability can be ignored since the probable variability due to sampling is either less than \$50,000 (the largest variation from rounding of figures) or less than a trivial percentage of the individual totals shown. In addition to the effects of sampling variation, the data in this report are subject to errors from such sources as the carry-over of data from month to month, errors in reporting or processing, the estimation of shipments valued under \$100 (estimated data for such shipments are included in the over-all export total and in the totals for "Finished manufactures" and "All other finished manufactures, exclusive of Special Category Type 1" but excluded from other totals), and the omission of parcel post shipments valued under \$50. Although the effect of such errors on the rounded totals in this report is probably small, the possibility of inaccuracy should be taken into account, particularly in using figures of relatively small magnitude.

Further information regarding coverage, valuation, compilation procedures and precision of export data is contained in the foreword of Report No. FT 410. For complete statement, see foreword in Foreign Commerce and Navigation of the United States.
